

Community Relations

Communications with the Public

General

The Board of Education believes it is important to inform the public about school curriculum, programs, and activities so citizens can participate in these programs. Concurrently, the school staff, administration, and Board of Education should be aware of the community's goals and concerns for its children so they may be given consideration in curriculum, program, and activity revisions.

To this end, the Board supports and encourages various means such as publications, press releases, open houses, and other public events to disseminate school district information and to hear from the community.
