

## **New Construction**

### **Naming/Renaming of School Buildings, Components of Buildings, and/or School Grounds**

It is the responsibility of the Board of Education to name/rename school buildings, components of buildings, and school grounds. Usually, this is done on the basis of geographic location. However, a school building, components of a building, and school grounds could be named/renamed to honor an individual who has given exceptional service to the children of Stafford.

To initiate the naming/renaming of a school building, component of a building, and school grounds to honor such an individual, the Board shall establish a sub-committee to receive community input and to make a recommendation. The formation of the sub-committee either may be initiated by the direct action of the Board of Education or upon presentation to the Board of a petition representing the signatures of one hundred (100) registered voters in the Town of Stafford. The subcommittee shall present its recommendation to the Board of Education for its approval.

Policy adopted: October 6, 2003
